DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 31, 2005 has been entered.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to an invader directed cleavage method identical to the Hall method, where the improvement comprises the method of analysis of the data set as described in steps b) and c) of claim 1. In particular, while Wittwer teaches analyzing data from amplification assays by look at the transformation of the data set using specific formulas, and while Wittwer may demonstrate some specific data which is nonlinear, Wittwer does not correlate or detect the target polynucleotide based upon whether the transformed data set exhibits nonlinear behavior. It is the use of the nonlinear behavior as the mode by which detection functions which patentably differentiates this method from Hall and Wittwer. There is no prior art suggesting the use of nonlinear data sets for detection of enzymatic reactions cited in the application. These claims as written are novel and are unobvious over the combination of Hall and Wittwer. Therefore, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
